

OUR DIVERSE OFFSHORE FLEET

Semi - Submersible Vessels
750 POB

MPSV/PSV
120T Subsea Crane
Up to 820m² Deck Space

Offshore Construction Vessel
DP3/250T AHC Crane

**Accommodation Vessels
and Work Barges**
Up to 238 POB

Diving Support Vessel
12 Man Saturation System

AHT/AHTS
Up to 255T of Bollard Pull

POSH DEEP C

POSH Deep C is a multipurpose offshore construction vessel ("OCV"), designed for ultra-deepwater operations and is equipped with DP-3 dynamic positioning system, 250 tonne AHC subsea crane, a Bollard Pull of 229 tonne and accommodate up to 100 persons.

OUR SERVICES

At POSH, we harness the full potential of your next floating offshore wind project with our comprehensive suite of solutions.

As leading specialists in offshore marine solutions, we leverage our proven track record and expertise to deliver a seamless, fully integrated approach to your project.

PLANNING & ENGINEERING: Our expert engineers meticulously design and plan your project, ensuring optimal functionality and a robust execution.

MOORING PRE-LAY: We leverage our expertise to pre-lay mooring systems, ensuring an efficient installation process for your floating wind structures.

TOW OUT & HOOK-UP: Our experts team will safely tow and connect your floating wind structures, ensuring a seamless transition from fabrication to operational status.

CABLE INSTALLATION: Our team possesses the expertise to install subsea cables, ensuring reliable and efficient power transmission for your project.

OPERATIONS & MAINTENANCE: We offer comprehensive operations and maintenance services to maximize the operational efficiency and longevity of your wind farm.

DECOMMISSIONING: We offer a comprehensive end-of-life management solution. This includes decommissioning process that adheres to all relevant environmental and regulatory requirements.

INTEGRATED TRANSPORTATION & INSTALLATION SOLUTION FOR FLOATING OFFSHORE WIND

WHY US?

PERFORMANCE

Executed more than 1000 ocean towages and floater hook-ups to date.

SAFETY

Safely executed >300 projects since 2016.

PRESENCE

Experienced in global operations. 6 global offices.

EFFICIENCY

Specialized vessels for mooring installation, limiting project duration and total installation cost.

“END-TO-END” SOLUTIONS

Taking full responsibility for the Transport & Installation scope, limiting the number of contractors and reduce project risk.

AVAILABILITY

Modern fleet of >50 vessels with high tow capacity, ensuring availability for your project.

POSH delivers specialised offshore marine solutions, supporting upstream energy development and operations globally.

PaxOcean offers end-to-end engineering services supporting the complete lifecycle of maritime and offshore assets.

PCL provides shipping services and maritime supply chain solutions for customers worldwide.

Pacific Workboats supplies a comprehensive suite of vessel towage services.

McPEC is a full-service EPC company specialising in modular structures for the offshore and onshore oil and gas, petrochemical, and data centre industries.
